B. ANALYTICAL TABLE

Note: The numbers given after each item refer to the pages of the " Telecommunication Journal " on which it is to be found.

A

Administrative Council. (See *Council*).

Aeronautical Radio Inc. Participation in the work of the CCITT 85.

Afghanistan. Personnel changes 34.
Telecommunication Training Centre 271.

Africa. African Broadcasting Conference 32, 62, 151, 296.
HF circuits network for —, by *J. Hinrichsen* 231.
Meeting on television in —, Lagos 223, 300.

Agencies. Convention on the privileges and immunities of the specialized — 29, 58, 184, 215, 266.

Agreement(s). — on international space communications, Washington 247, 273.
Regional — for the African Broadcasting Area concerning the use of frequencies by the broadcasting service in the very high frequency and ultra high frequency bands (Geneva, May 1963) 266, 354.
Special regional — concerning the use of the 100-104 Mc/s band by the broadcasting service 147.

Albania (People's Republic of). Telegraph and Telephone Regulations (Geneva, 1958) 58.

Algeria (Democratic and Popular Republic of). Convention on the privileges and immunities of the specialized agencies 184.
Technical co-operation experts 151.

America (Latin). Educational television and radio programmes 154.
First microwave communications system linking two — nations 155.

Anniversary. Soviet television is twenty-five years old 190.

Antarctica. VLF phase recording in — 272.

Antenna(e). " Concorde " supersonic airliner will be its own radio aerial 67.
Olympic Games — 301.
Transportable HF — 36.

Arab (United — Republic). Mr. M. Riad, Minister of Posts, Telegraphs and Telephones 125.
Technical co-operation experts 32.

Argentine Republic. Adjustment in phase time signals 127.
Broadcasting policy 244.
Convention on the privileges and immunities of the specialized agencies 29.
First microwave communications system linking two Latin American nations 155.
Personnel changes 9.

Article(s). Choice of a frequency complement for a given circuit in the HF (decametric) band, by *W. García Ríos* 195.
Decibel (The) an overworked, misunderstood and frequently maltreated unit, by *R. Froom* 257.
Development of modern signalling (The) for automatic switching systems, by *O. Myers* 167.
HF circuits network for Africa, by *J. Hinrichsen* 231.
How to compute the apparent positions of communication satellites in the most useful way, by *H. C. Freisleben* 138.
International Consultative Committees (The) and the problems of the new and developing countries, by *S. A. Sathar* 21.
International method of measuring telephone service levels, b *I. Lönnqvist* 261.
Method of predicting the necessary future telephone density, b *Z. Rafałowicz* 303.
Moonbounce, by *E. P. Tilton* 307.
NBS studies conjugate point phenomena, *National Bureau Standards* 94.
Oceanography's radio requirements, by *F. Dellamula* 51.
Organization (The) of maritime mobile very high frequenc traffic in the Netherlands, technical data concerning th traffic, by *D. J. van Doorninck* and *W. P. Heespelink* 71.
Past and future...integrating the ITU headquarters, by *J. Gayer* 159.
Possible uses of satellites for navigation and traffic co-ordinatio by *J. W. Campbell* 37.
Power limits and co-ordination procedures applying to frequenc bands shared by space and terrestrial services, by *J. K. Jowett* 249.
Prediction of ionospheric characteristics at CRPL for sky-wav radio propagation at high frequencies, by *K. Davies* 339.
Rescue of astronauts in distress through the co-operation telecommunication service, by *J. Iványi* 134.
Satellite communications—Small station aspects, by *S. G. Lu* 225.
Semateme (The), by *R. Roquet* 311.
Some considerations on reception of the meteorological satelli Nimbus 1, by *F. Grandchamp* 328.
Some legal aspects of satellite communications, by *J. Bušák* 27
Some thoughts on the application of a time rate in automat local telephone traffic, by *H. Kiderlen* 172.
Structure (The) of the ITU, by *F. Nicotera* 157.
Suggestion concerning a satellite sub-system for meteorology an radiotelegraphy, by *G. Valensi* 11.
Ten years relaying television by the Deutsche Bundespost, b *J. Müller* 77.
Uses (The) of oblique ionograms in frequency utilization, b *K. Davies* 281.
Video film recording, by *I. S. Douglas* 207.
Wave propagation as a basis for the planning of UHF tran mission networks, by *U. Kuehn* 43, 136.
Work of the Plan Committee in the intercontinental spher (Rome, December 1963), by *R. Chapuis* 98.
World numbering and routing plans for automatic telephon operations, by *H. C. McGuire* 128.

Assembly. (See *Conference*).

Astronautics. XV International Astronautical Congress 127.
Rescue of astronauts in distress through the co-operation telecomunication service, by *J. Iványi* 134.

Australia (Commonwealth of). Adjustment in phase of time signa 127.

— to provide ground station for use in the NASA's programme 15
CCITT meetings, Melbourne 5.
Compac 6, 35.
Sea launch improves signals 248.
Transmitter in a tooth ! 153.

Autelli, Juan Antonio. Telepersonality 24.

B

Beacon. Ground — for distance measuring equipment *(DME)* 9.
Radio — for manned spacecraft 224.

Belgium. Field trial with an intercontinental transit exchange 222.
First automatic transatlantic telex service 9.
Gifts for ITU headquarters 23.
International subscriber dialling between the United Kingdom and the European continent 155.

Board.

Editorial — of the Telecommunication Journal. Change of chairman 189.

International Frequency Registration — (IFRB). Mr. Mirza, Chairman for 1964 3.
Seminar 150.
Vacant posts 147.

Bolivia. — -United Kingdom telex service opened 192.

Books. Bibliographic notes on — received in the Library (in brackets, language of publication):
Advances in space science and technology, vol. V (English), by *F. I. Ordway* 116.
Analysis of electric tube- and transistors-network (French), by *A. Kaufmann, B. Grabowski* and *J. Thouzery* 145.
David Sarnoff: putting electrons to work (English), by *J. Tebbel* 289.
Electric and electronic measurements (French), by *J. Thurin* 116.
Electro and mechano-acoustic transducers — Loud speakers and microphones (French), by *R. Lehmann* 289.
Electronic digital integrating computers — Digital differential analyzers (English), by *F. V. Mayorov* 350.
Electronic engineering — Telecommunication equipment (French), by *J. Mornand* 25.
Electronic technology — Telecommunication equipment (French) 2nd edition, by *J. Mornand* 317.
Handbook of PBX telephony (German), by *K. Hantsche* 262.
Handbook on microwave measurements (English), by *M. Sucher* and *J. Fox* 181.
International law-making process (The): a case study on the international regulation of space telecommunication (English). by *F. W. Huszagh* 317.
International telex directory, 12th edition 289.
Introduction to television engineering, vol. I: Photography, restitution, transmission, colour television (German), by *W. Dillenburger* 289.
Mass media and national development; the role of information in the developing countries (English), by *W. Schramm* 317.
Microwave engineering (English), by *A. F. Harvey* 181.
Power systems for space flight (English), edited by *M. A. Zipkin* and *R. N. Edwards* 25.
Principles of feedback design (English), by *G. Edwin* and *T. Roddam* 83.
Principles of telegraphy (English), by *N. N. Biswas* 236.
Problems of electronics: for engineers, research workers and students in universities and high schools (French), by *R. Guillien* 212.
Proceedings of the Second Colloquium on microwave communication (English) 83.
Radio amateur's handbook (The) (English), 41st edition, *American Radio Relay League* 181.
Reception technique in the UHF-range (German), by *F. Möhring* 350.
Remote dialling systems throughout the world (German), by *G. Seelmann-Eggebert* 236.
Sende- und Gleichrichterröhren — Electron tubes — Tubes électroniques, by *S. A. Brown Boveri and Co.* 236.
Space carrier vehicles: design, development and testing of launching rockets (English), by *H. O. Lange* and *R. J. Stein* 25.
Space law and government (English), by *A. G. Haley* 145.
Study of electric circuits, vol. II:Operational states (French), by *J. Lagasse* 116.
Summary of electromagnetic theory (French), by *P. Poincelot* 145.
Television engineering, vol. I (English), by *S. W. Amos, D. C. Birkinshaw* and *J. L. Bliss* 116.
Television vocabulary in Italian, English, French and German, by *A. Sabbatini* 236.
Telling the UN story (French, English, Spanish), by *L. S. Kenworthy* 83.
Theory and technique of telegraph transmission (French), by *R. Roquet* 83.
Transistor amplifiers and audio frequencies: Principles of design (English), by *T. Roddam* 182.
Transistor applications (English), by *R. F. Shea* 212.
Transistor circuits in electronics (English), by *S. S. Hakim* and *R. Barrett* 262.
Transistor inverters and converters (English), by *T. Roddam* 25.
Who is who in Indian science? (English), published by *H. Kothari* 350.

Booth, Charles F. Telepersonality 230.

Brazil. International Telecommunication Convention (Geneva, 1959) (ratification) 353.
Visit in the ITU of Brazilian expert 64.

Broadcasting. — policy in the Argentine 244.
Control of interference from electromedical apparatus 33.
ITU's assistance requested to silence " Radio Caroline " 123.
Radio and television — by infrared rays 91.
Sound and vision — in the world 154.
Success of the — school leaving certificate 89.
United Kingdom Postmaster-General on pirate — 190.

Brunei. Inclusion in the Overseas Territories for the international relations of which the Government of the United Kingdom of Great Britain and Northern Ireland are responsible 239.

Bulgaria (People's Republic of). Telecommunications 325.
Television sets 7.

Bureau.

International — of Time (BIH). Uniform time and constant frequency for 1964 34.

National — of Standards (NBS). The — studies conjugate point phenomena 94.

Burma (Union of). International Telecommunication Convention (Geneva, 1959) (ratification) 292.

Bušák, Jan. Some legal aspects of satellite communication 276.

C

Cable(s). — circuit for exchange of weather information 66.
— Spain-Canary Islands 152.
— Virgin Islands-Venezuela 247.
— France-Morocco 223.
Communication transmission approaches speed of light 224.
Compac 6, 35.
Crab who heard too much 154.
Field trial with an intercontinental transit exchange 222.
Hungarian — testing apparatus 65.
ITU-Tokyo call over new — 188.
Laying of *Seacom* begins 191.
Parachutes lower — to the sea-bed 245.
Pressurization technique reduces — failures 326.
Telephone — United Kingdom-Fed. Rep. of Germany 7, 90.
Tele-trench 326.
World's first transistorized — system 325.

Cableship. " Cable Restorer " 152.
" Monarch " 7.

Calendar. — of ITU conferences and meetings 29, 59, 85, 118, 146, 185, 215, 239, 266, 293, 319, 353.

Cameroun (Republic of the). Technical co-operation experts 32.

Campbell, James W. Possible uses of satellites for navigation and traffic co-ordination 37.

Canada. Adjustment in phase of time signals 127.
Compac 6, 35.

Direct dialling — -Japan 246.
Major ground station for satellite communications 34.
Microwave system: along the St. Lawrence river 33;
— Canadian-National-Canadian Pacific 244.
Semi-automatic telephone calls — -United Kingdom 90.
Switching system for air lines 34.

Canadian Overseas Telecommunication Corporation. Participation in the work of the CCIR 184.

Canary Islands. Cable Spain- — 152.
Regional Agreement for the African Broadcasting Area concerning the use of frequencies by the broadcasting service in the very high frequency and ultra high frequency bands (Geneva, May 1963) 266.

Caribbean. Communications scheme 90.
First phase of Bahamian telecommunication scheme 123.
Telephone expansion in Trinidad and Tobago 125.

Caroline. ITU's assistance requested to silence " Radio — " 123.

Catá, Alfonso H. " Journal " Editorial Board — Change of chairman 189.

Centenary. International sculpture competition for ITU's — monument 322.
The ITU and the — 4.

Chapuis, Robert. Work of the Plan Committee in the intercontinental sphere (Rome, December 1963) 98.

China. ITU's Secretary-General visits Special Fund project in Taiwan 323.
Partial revision of Radio Regulations (Geneva, 1959) by the EARC (Geneva, 1963) 353.
Technical co-operation experts 271.

Circuits. (See *Cables and other telecommunication services*).

Club.

International Amateur Radio — (IARC). Second International Amateur Radio Convention, Geneva 1964 190, 270.

Colloquium. (See *Conference*).

Colombia (British). Television aids fight against cancer 153.

Colombia (Republic of). Educational television and radio programmes 154.
Personnel changes 299.

Colt de Wolf, Francis. Retirement 125.

Commission.

Economic — for Asia and the Far East (ECAFE). Meeting of Working Party of telecommunication experts, Tokyo 272.

International Oceanographic — (IOC). Oceanography's radio requirements, by *F. Dellamula* 51.

Committee.

— *against radio interference.* — in Denmark 64.

International Radio Consultative — (CCIR). Colour television meeting, London 88.
International Consultative Committees (The) and the problems of the new and developing countries, by *S. A. Sathar* 21.
Participation in the work of the — 85, 147, 184, 214, 239, 292.
Plan Committee meeting, Rome 2, 3, 62.
Smoothed monthly sunspot numbers 29, 57, 82, 96.
Solar indices for ionospheric propagation 119, 147, 179, 214, 238, 265, 292, 318, 352.
XXth scientific session of the A. S. Popov Society 191.

International Telegraph and Telephone Consultative — (CCITT). International Consultative Committees (The) and the problems of the new and developing countries, by *S. A. Sathar* 21.
Meetings: Copenhagen, Geneva 88;
— Melbourne 5.
Participation in the work of the — 58, 85, 147, 184, 215, 292, 354.
Plan Committee meeting, Rome 2, 3, 62.
Speed of transmission of international telegrams 259.
III Plenary Assembly 150, 189, 218.

Plan —. Rome 2, 3, 62.

Commonwealth. Laying of *Seacom* begins 191.

Communication(s). Agreement on international space —, Washington 247, 273.
Caribbean — scheme 90.
— in desert locust control 127.
— system for the Philippines 272.
— transmission approaches speed of light 224.
Data transmitter 68.
Electronic eye for long-distance space — 156.
European Conference on satellite — (CETS) Rome, Karlsruhe, London 66.
Expansion of Nigerian — 298.
Gas laser — 91.
Ground station for — satellites: Canada 34;
— Fed. Rep. of Germany 8.
How to compute the apparent positions of — satellites in the most useful way, by *H. C. Freisleben* 138.
How to prevent satellite — interruption 326.
Microwave system: for deep-space — 192;
— linking two Latin American nations 155;
— portable 192.
Mr. Stevenson on space — 65.
100 kc/s underground — system 153.
Round-the-world automatic telex 69.
Satellite — -Small station aspects, by *S. G. Lutz* 225.
Satellite Group Legal Unit holds London meeting 325.
Some legal aspects of satellite —, by *J. Bušák* 276.
Switzerland's new mountain top " car-calling " network 65.
Telephone exchange as nerve centre of United Kingdom Southern Region railway — 124.
Tele-trench 326.
Teletype system between hospital and laboratory 36.
Transmission of voice — in digital form 68.
United Kingdom policy on satellite — 89.
Utilization of millimetre waves for — 92.
Watercom, underwater — system 193.

Communications Satellite Corporation. Participation in the work of the CCIR 239, CCITT 147.

Compac. Opening of the — 6, 35.

Compagnie industrielle des télécommunications (CIT). New denomination of the Compagnie industrielle des téléphones 354.

Companies. (See *under their own denominations*).

Conference(s). Berlin Seminar on multiple utilization of electrical communication circuits 297, 324.
Calendar of ITU — or meetings 29, 59, 85, 118, 146, 185, 215, 239, 266, 293, 319, 353.
CCIR —: Colour television meeting in London 88.
Plan Committee, Rome 2, 3, 62.

Telephone Manufacturing Company Limited. Participation in the work of the CCITT 38.

Teletraffic. 4th International — Congress, London 300.

Teletype. Switching system for air lines 34.
— communications system between hospital and laboratory 36.
— transmits laboratory data on steel under production 275.

Televarsity. Electronics: the expanding frontier 10.

Television. Colour — discussions, London 325.
Colour — in Japan 244;
— in 1967 in the United Kingdom 152;
— meeting, London 88.
Communications transmission approaches speed of light 224.
Control of interference from electromedical apparatus 33.
Educational — : Ivory Coast 298;
— Latin America 154.
Electronics: the expanding frontier *(Televarsity)* 10.
High-lights in Japanese — *(Telstar, Relay)* 152.
Live — United States, Europe to Japan 67.
Malaysia west coast — links 89.
Microwave communications system linking two Latin American nations 155.
Modernization and increase in the power of — stations in Poland 153.
Radio and — broadcasts: by infrared rays 91;
— in the world 154.
Saturn launching televised over ordinary telephone lines 327.
Soviet — is twenty-five years old 190.
— aids fight against cancer 153.
— and industry in Hungary 301.
— in Tunisia 90.
— sets in Bulgaria 7.
Ten years relaying — by the Deutsche Bundespost, by *J. Müller* 77.
Three million US schoolchildren follow — courses 191.
Tiros VII breaks record for — picture transmission 245.
Unesco Conference on African — , Lagos 223, 300.
Video film recording, by *I. S. Douglas* 207.

Telex. Automatic — in Finland 221.
50 000 — subscribers in the Fed. Rep. of Germany 273.
Inauguration of — service: Bolivia-United Kingdom 192;
— transatlantic 9;
— Uruguay 299.
ITU — number 29.
Round-the-world automatic — 69.
Service with Ghana 239.

Telstar. High-lights in Japanese television 152.
Maser used to receive telephone signals via — 274.

Territories.

Group of — represented by the French Overseas Post and Tele communication Agency. Partial revision of the Radio Regu lations (Geneva, 1959) by the EARC (Geneva, 1963) 353.
Regional Agreement for the African Broadcasting Area concern ing the use of frequencies by the broadcasting service in th very high and ultra high frequency bands (Geneva, May 1963 354.

Overseas — for the international relations of which the Governmen of the United Kingdom of Great Britain and Northern Irelan are responsible. Integration of Brunei 239.
Technical assistance mission to Singapore 190.

— *of the United States of America.* Partial revision of the Radi Regulations (Geneva, 1959) by the EARC (Geneva, 1963) 184

Thailand. Editors' roundtables, UN iniciative, Bangkok 3.
Special Fund project 323.

Tilton, Edward P. Moonbounce 307.

Time signals. Adjustment in the phase of — 127.

Tiros. — VII weather satellite breaks record for television pictur transmission 245.

Tunisia. Development of telecommunications 64.
Television 90.

Turkey. Gifts for ITU headquarters 141.
Personnel changes 299.

U

Uganda. Partial revision of the Radio Regulations (Geneva, 1959 by the EARC (Geneva, 1963) 239.
Regional Agreement for the African Broadcasting Area concern ing the use of frequencies by the broadcasting service in th very high and ultra high frequency bands (Geneva, May 1963 266.

Union.

International Telecommunication — (ITU). Administrative Counci 122, 150.
Aeronautical Conference 62, 88, 151.
African LF/MF Broadcasting Conference 32, 62, 151, 296.
Berlin Seminar on multiple utilization of electrical communica tion circuits 297, 324.
Calendar of —'s conferences and meetings 29, 59, 85, 118, 146 185, 215, 239, 266, 293, 319, 353.
CCIR (See *International Radio Consultative Committee).*
CCITT (See *International Telegraph and Telephone Consultative Committee*).
Centenary 4.
Editorial Board " Telecommunication Journal " — change o chairman 189.
Editors' roundtables, new UN initiative, Bangkok 3.
Gifts for — headquarters 23, 141, 180, 219.
IFRB (See *International Frequency Registration Board*).
International sculpture competition for — Centenary monumen 322.
Invitations accepted to conferences or meetings external to the — 59, 85, 118, 146, 185, 215, 239, 265, 293, 319, 352.
— 's assistance requested to silence " Radio Caroline " 123.
— -Tokyo call over new cable 188.
List of recent and forthcoming publications of the — 30, 60 86, 120, 148, 186, 216, 240, 267, 294, 320, 356.
Past and future...integrating — headquarters, by *J. H. Gaye* 159.
Plan Committee meeting, Rome 2, 3, 62.
Second International Amateur Radio Convention, Geneva 1964 190, 270.
Secretary-General's visit to Taiwan Special Fund project 332

Structure of the — (The), by *F. Nicotera* 157.
Technical assistance programme 1965 354.
Technical co-operation experts 6, 7, 32, 64, 151, 190, 220, 271, 297, 298, 323, 324.
Telex number 29.
Visiting the —: Mr. Fuzesi (Brazil) 64.
Mr. Jarrín Aguilar (Ecuador) 296.
Mr. Moskwa (Poland) 219.
Mr. Simulescu (Roumania) 219.
— *of Soviet Socialist Republics.* New radiotelescope 273.
Probe I continues its flight 151.
Problem of cosmic radio communications 155.
Soviet television is twenty-five years old 190.
XX scientific session of the A. S. Popov Society 191.
United Kingdom of Great Britain and Northern Ireland. Adjustment in phase of time signals 127.
Bolivia- — telex service 192.
Cable — -Fed. Rep. of Germany 7, 90.
Coaxial plug can incorporate attenuator 10.
Colour television: discussions, London 325;
— in 1967 152;
— meeting, London 88.
Concorde supersonic airliner will be its own aerial 67.
Control of interference from electromedical apparatus 33.
Death of early radiocommunication pioneer 126.
Electronics: eye for long-distance space communications 156;
— the expanding frontier *(Televarsity)* 10.
European Conference on satellite communications (CETS), London 66.
Expansion of telecommunications 273.
4th International Teletraffic Congress, London 300.
Goonhilly Down to catch *Early Bird* 220.
International subscriber dialling — -European continent 155.
ITU's assistance requested to silence " Radio Caroline " 123.
Jodrell Bank: parametric amplifiers 274;
— second radio telescope 65.
Laying of *Seacom* begins 191.
Microwave links — -France 247.
Mr. Wolstencroft appointed Deputy Director-General of the GPO 191.
100 kc/s underground communication system 153.
Parachutes lower cables to the sea-bed 245.
Personnel changes 274.
Planar epitaxial micrologic 92.
Policy on satellite communications 89.
Pressurization technique reduces cable failures 326.
Rainbow, storm warning radar 301.
RAM, airport safety aid 155.
Satellite Group Legal Unit holds London meeting 325.
Semi-automatic telephone calls Canada- — 90.
Solas 11, compact survival radio for lifeboats 224.
Speeding overseas telegrams 124.
Telephone exchange: nerve-centre of Southern Region railways 124;
— with no operator 8.
Telephone waiting list to be ended 65.
Television aids fight against cancer 153.
Transportable HF aerial 35.
— Postmaster-General on pirate broadcasting 190.
World's first transistorized cable system 325.
United States of America. Agreement on international space communications, Washington 247, 273.
Adjustment in the phase of time signals 127.
Australia to provide ground station for use in — satellite programme 152.
Cable circuit for exchange of weather information 66.
Complex interconnexion problem solved 36.
Computerized public telegraph system 192.
Construction of tracking facilities for next *Syncom* 9.
Data transmitter 68.
Deflection and steering of laser beams 193.
Deflector for lasers 93.
Direct dialling Italy- — 246.
Dynamic computer display system 248.
Echo suppressors 193.
Electronic eye for long-distance space communications 156.
Experimental transmission of handwriting on telephone circuits 126.
Eye of *Nimbus* 301.
Field trial with an intercontinental transit exchange 222.
Gas laser communications 91.
Goonhilly Down to catch *Early Bird* 220.
Ground receivers to help determine the exact position of satellites 92.
Harmful interference from love 92.
High-lights in Japanese television *(Telstar, Relay)* 152.
High-precision radio altimeter 68.
How to prevent satellite communication interruption 326.
Light beam method of voice communications 248.
Live television from the — and Europe to Japan 67.
Microwave system for deep-space communication 192.
Mr. Lebel's poem 325.
Mr. Stevenson on space communications 65.
NBS studies conjugate point phenomena, *National Bureau of Standards* 94.
Partial revision of the Radio Regulations (Geneva, 1959) by the EARC (Geneva, 1963) 184.
Personnel changes 274.
Portable microwave system 192.
Radar safeguards motorists 36.
Radio: beacon for manned spacecraft 224;
— channels across the equator 68.
Retirement of Mr. Colt de Wolf 125.
Saturn, launching televised over ordinary telephone lines 327.
Spain's first space station on the air 223.
Spectrometer for laser analysis 126.
Star and planet trackers 275.
Switching system for air lines 34.
Telephones in 1963 125.
Tele-trench 326.
Teletype: communication system between hospital and laboratory 36;
— transmits laboratory data on steel under production 275.
Telex service Belgium- — 9.
Three million schoolchildren follow television courses 191.
Tiros VII breaks record for television picture transmission 245.
Transmission of voice communications in digital form 68.
Utilization of millimetre waves for communication 92.
VLF recording in Antarctica 272.
Watercom, underwater communication system 193.
Waveguide switch 10.
Wireless transmission of. . .power 326.
Uruguay (Oriental Republic of). Microwave communications system linking two Latin American nations 155.
Telex service 299.

V

Vacant posts. IFRB — 147.
Valensi, Georges. Suggestion concerning a satellite sub-system for meteorology and radiotelegraphy 11.
Vatican City State. Partial revision of the Radio Regulations (Geneva, 1959) by the EARC (Geneva, 1963) 353.
Venezuela (Republic of). Cable Virgin islands- — 247.
Technical co-operation experts 32, 298.
Viet-Nam (Republic of). Personnel changes 9.
Virgin Islands. Cable — -Venezuela 247.

W

Watercom. Underwater communication system 193.
Watson-Watt, Sir Robert. Telepersonality 97.

Wolstencroft, Alan. Mr. — appointed Deputy Director-General of the United Kingdom GPO 191.

Y

Yemen. Personnel changes 126.
Yugoslavia (Federal Socialist Republic of). Special regional agreement concerning the use of the 100-104 Mc/s band the broadcasting service 147.

Z

Zambia (Republic of). Formerly Northern Rhodesia 353.
